Appendix: Departmental Cost Summary.

I. Scope

This Equipment Note gives guidance on the basic equipment requirements for a ward unit to accommodate 30 low grade severely subnormal patients or other mentally subnormal patients who are severely physically handicapped and require constant supervision and habit-training. It is intended to be read in conjunction with Hospital Building Note No. 31 which relates to the design and planning of such a ward unit and with Hospital Building Note No. 30 which deals generally with accommodation for psychiatric patients.

II. General Considerations on the Use of Equipment Notes

Equipment Note No. 1 (Equipping a hospital building) provides an introduction to the series of departmental Equipment Notes, advice on their application and guidance on the task of preparing equipment schedules for individual building projects. This departmental Equipment Note is intended to be used within the general planning framework set out in Equipment Note No. 1 and in the manner described therein.

The following method of classifying equipment, which is explained in more detail in Hospital Equipment Note No. 1 is used throughout this Note:

The term " equipment " covers all items necessary for the functioning of the hospital. Short-term consumable supplies such as fuel, stationery, food, drugs and dressings are not included.

Equipment is classified into three groups:

Group I: items usually supplied and fixed by the contractor for the works.

Group II: items having a permanent or semi-permanent location and having a significant effect on space and/or structural requirements:

(*a*) those supplied by the hospital authority and fixed by the contractor for the works;

(*b*) those supplied by the hospital authority and put in position by them or on their instructions outside the general construction contract.

Group III: smaller items, usually storage items, supplied and put in position by the hospital authority.

III. Special Considerations in Respect of this Note

The equipment detailed in this Note is regarded as suitable to the ward unit described in Building Note No. 31 and has been listed in room (or space) sequence conforming to the Building Note.

The rooms are listed under four main groups, as explained in Building Note No. 31. These groups are as follows:

Group (A): Entrance, staff and visitors' rooms, ward stores, treatment room, ward pantry.

Group (B): Ward (dormitory area), sister's office, nurses' station, day space, dining space, verandah.

Group (C): Sanitary facilities, changing rooms, linen and clothes stores, sluice room.

Some fixed items of equipment (Group I) have already been mentioned (and costed) in the Building Note, but it has been thought useful to include them again in the Equipment Note, which represents the results of a comprehensive review of the requirements. Reference should, however, be made to the Building Note—Part V, Engineering Services—for further information on the mechanical services and electrical installation. Structural elements, floor coverings, non-specialised heating and lighting fittings and similar items which are basic to any building are not included in the Equipment Note; neither are window blinds and window curtain tracks since the requirements may vary with local circumstances.

It is for individual hospital authorities to make rules about smoking in the hospitals under their control and management (see Ministry Memorandum HM(63)43) and accordingly no reference is made to ashtrays or to smoking throughout this Note.

Throughout the schedule, for the sake of uniformity, references to towel dispensers are associated with disposal bins for paper towels. Suitable adjustments will need to be made where other types of towel are to be used.

IV. Cost

Guidance on the cost of equipping a psychiatric ward type 1 to the standard shown in this schedule is given against the list of equipment for each room. Departmental cost summaries are shown in the Appendix to the Note. In using these cost figures, the considerations referred to in Section IV of Equipment Note No. 1 should be borne in mind.

The cost figures in this schedule and in the Appendix are related only to Group II and Group III equipment. As a matter of convenience, Group I items of a specialised nature are listed in each room schedule, but these have already been taken into account in the cost allowance for construction (including engineering), in the appropriate Cost Note in Appendix E to Hospital Building Note No. 2.

DEPARTMENTAL COST SUMMARY

(To be read in conjunction with the explanatory Notes in Section IV of this Equipment Note and Section IV of Hospital Equipment Note No. 1)

The room cost guide figures for basic equipment (Groups II and III), applied to standard schedules of basic accommodation, suggest a departmental equipment cost of the order of £5,925.

In this total no account is taken of the following:

(*a*) Equipment required for basic accommodation, additional to the basic list, some guidance on which is given under the appropriate rooms;

(*b*) Equipment required in "additional accommodation", cost guides for which are shown on the appropriate pages as for basic accommodation.
